DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on October 22, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,667,115 B2 (Goodrich, et al.) has been reviewed and is accepted. The terminal disclaimer has been recorded.

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. Note that Figure 1 in the patent application is identical to Figure 17 on page 19 of the cited reference "Internal Corrosion Testing of Aluminum Radiator Tube Alloys" by S. Palmer and B. S. Hindin.

Specification

The abstract of the disclosure is objected to because the abstract has not been written as one paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8 to 10, 14, 15, 17, and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter

Art Unit: 1775

which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Pages 9 and 13 of the specification do not mention the corrosion/erosion behavior as recited in claims 8 to 10. Page 7 of the specification does not mention the brazing sheet thickness range as recited in claims 14 and 15. Pages 9 to 17 of the specification do not mention the maximum and/or average pit depth with respect to fluid velocity as recited in claims 17 and 18.

Allowable Subject Matter

Claims 1, 2, 5 to 7, and 11 to 13 are allowed.

Response to Arguments

Applicant's arguments filed on October 22, 2004 have been fully considered but they are not persuasive. The subject matter presented in claims 8 to 10, 14, 15, 17, and 18 constitute new matter in this Continuation patent application. The parent application does not provide any basis or support for the newly-claimed subject matter in this Continuation application because the parent application does not describe or reasonably suggest any brazing sheet composition having the following characteristics or properties: **(a)** a size of 0.007" to 0.015"; **(b)** the newly-claimed corrosion/erosion behavior; and **(c)** the newly-claimed maximum and/or average pit depth with respect to fluid velocity.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 1775

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
